

NOTES/NEWS

WWW.SFRINDUSTRIES.COM

JANUARY 2018

40-YEAR ANNIVERSARY:

SFR Industries will celebrate 40 years of operation this year. From a humble start-up with 1,800 sq. feet of floor space and two used extruders, to our current 66,000 sq. foot extrusion factory with over 30 lines, as well as our new 15,000 sq. foot warehouse/inventory facility, it has been a great journey. Bob Stumm, President and Owner, extends his sincere gratitude to all customers and employees who have helped make this possible over the years. We expect more growth and are excited about the future!

NEW VICE PRESIDENT:

Congratulations go out to Paul Borowick, who joined SFR 2 years ago as our Sales and Development Manager and has recently been promoted to Vice President at SFR Industries.

PRINT APPROVAL/LEAD TIME:

When new profiles are quoted for development, the lead time is generally 5-6 weeks pending receipt of PO and approved print. Prints submitted by customer are considered approved unless changes are recommended to make the part extrusion-friendly. Prints produced or revised by our Tooling Department will require signature for approval. The lead time for the development will start when the print approval is received, making this vital for developing your samples in a timely manner.

GLOBAL SHOP 2018:

SFR Industries will be exhibiting at Global Shop 2018, which is at McCormick Place in Chicago this year from March 27th to March 29th. Our booth number is 943 and we invite anyone attending to visit us!

**WISHING A HAPPY AND
SUCCESSFUL 2018 TO ALL!**
