

NOTES/NEWS

OCTOBER 2017

CUSTOMER SERVICE:

An advocate is a person who argues for or supports a cause. Our Customer Service Department stresses advocacy for the client. From processing your order, releasing to production and monitoring progress, to shipment, your Customer Service Representative (CSR), is your most important contact at SFR Industries. The CSR will monitor the progress of your orders and will be your in-house proponent in daily meetings, when necessary, with production and management staff to facilitate timely deliveries, etc.

TOOLING TIP; CO-EXTRUSION OPTION:

Co-extrusion is a great way to make an extrusion in more than one color or dual durometers. The tooling is more costly than single durometer; however, in many cases can reduce the number of parts needed for an assembly by providing one part with multiple functions. Our proprietary methods of securing our co-extruded materials give you confidence that your product will handle the most demanding conditions.

PROFILE ESTIMATING/COSTS:

There are several factors in consideration when estimating and/or reviewing costs of a profile. These include, but are not limited to pounds of raw material and color per thousand feet, line speed, packaging, and labor. SFR strives to offer the most economical pricing for each profile by maintaining optimal run conditions through repeatability and procurement of raw materials at the lowest costs attainable.

RAW MATERIAL SUPPLY/WEATHER:

SFR has been fortunate so far in that, while we did experience minor delays, to date the supply of raw materials was not too adversely affected by the recent active hurricane season.

UPCOMING HOLIDAY SCHEDULE:

November 23-24, 2017	CLOSED
December 25, 2017	CLOSED
January 1, 2018	CLOSED

WISHING EVERYONE A HAPPY HOLIDAY SEASON!
